

WAVY EDGE H&L DISCS

Kasco's wavy hook & loop discs are perfect for sanding small contoured pieces. Since the disc wavy edge extends over the edge of the backup pad they will conform to convex shapes like wood bowls. Our discs are not the typical paper, but cloth back for much longer disc life and durability. These cloth discs will not tear. Also can be special ordered in 3" diameter.

With the 1/4" spindle backup pad they can be used with electric drills and other collet tools. They are especially popular with wood turners, wood bowl makers, and other craftsmen.

SEMI-FLEX DISCS

Semi-flex discs offer a thick layer of abrasive grain in unique swirl pattern that creates an air flow for cooler running and less clogging. These discs are ideal for stock removal over a wide area.

Requires the use of a RFD back-up pad, but that pad may be smaller than the disc diameter. For example, a 4 1/2" resin fiber disc back-up pad may be used with the 7" disc.

Aluminum Oxide Use on ferrous metals.

Silicon Carbide Use on nonferrous metals and concrete/masonry.
